To whom it may concern:

I am a Javascript web developer who is passionate about coding, technology, and education. When I am not typing away at my computer, you can find me riding my motorcycle during the summer, or boarding down a mountain in the winter. I am currently seeking employment in the Seattle area.

Experience:

June 2012 – Nov 2013	Alpine Aire Heating & Cooling: Webmaster (desktop & mobile), HVAC service technician, leadership role in a small business.
June 2011 – June 2012	Priveazy: Lead Content Engineer. Responsible for creating and maintaining content on a large website. Also provided usability and design input. Created media with the Adobe Creative Suite.
Nov 2008 – June 2011	UW Surplus Store: Student Worker. Was responsible for building computers for resale, wiping hard drives, and general warehouse labor.

Development Projects:

TradePro	An educational website that simulates electrical circuitry, designed to prepare HVAC service technicians.
AlpineAire.net	A business website designed to perform well in SEO and encourage customers to call for an appointment.
Job Tracker	A customer database that tracks Jobs, Service, Equipment, and Inventory.

Skills:

Javascript – HTML/CSS – jQuery – Underscore – Backbone – Node – MongoDB – KineticJS – XML – PHP – MySql – SEO – UX – Github – Gimp – Adobe Creative Suite

Education:

Codefellow	I recently completed the Code Fellows Javascript Boot Camp. I attended this class as an opportunity to expand my technical skill set.
University of Washington	I graduated with a degree in English from the University of Washington, Seattle earning a 3.2 gpa
